ABOUT ME

Computer Science undergraduate with strong interest in Cybersecurity, Threat Analysis, and SOC Operations. Skilled in networking, vulnerability assessment, OSINT, and security monitoring tools. Passionate about hands-on learning through practical labs, TryHackMe, and real-world security projects. Actively building projects and sharing cybersecurity insights on LinkedIn.

EDUCATION

Bachelor of Science in Computer Science

Mahendra Pratap Sharada Prasad Singh College of Science,
Arts & Commerce
University of Mumbai, Mumbai, Maharashtra

CGPI: 8.00

2023 - 2026

TECHNICAL SKILLS

Cybersecurity	Networking, Nmap, Wireshark, Burp Suite, OWASP, SIEM (Basics), Splunk (Basics), Kali Linux, OSINT, Threat Intelligence
Programming & Web	HTML, CSS, JavaScript, TypeScript, Basic Python, APIs
Frameworks & Tools	Tailwind CSS, Vite, Git, GitHub, VS Code, Cursor, Antigravity
Core Concepts	Phishing Detection, Vulnerability Assessment, Security Monitoring, Web Security, Incident Analysis
Soft Skills	Problem Solving, Communication, Teamwork, Adaptability, Analytical Thinking

PROJECTS

Email & URL Threat Analyzer

Live Demo: <https://email-threat-analyser.netlify.app/>

HTML, CSS, JavaScript

- Developed a cybersecurity-focused web application to analyze suspicious emails and URLs for phishing indicators and malicious activity.
- Implemented threat scoring and phishing detection logic using client-side analysis techniques.
- Built an interactive dashboard displaying scan results, risk indicators, and threat insights.
- Designed responsive dark/light mode UI for improved user experience and accessibility.
- Simulated real-world SOC investigation workflows for educational and portfolio purposes.

CyberFlow Security Dashboard

Live Demo: <https://security-suite-nine.vercel.app/>

Vite, TypeScript, Tailwind CSS, JavaScript

- Built a modern cybersecurity dashboard inspired by Security Operations Center (SOC) monitoring environments.
- Developed responsive analytics panels for threat monitoring, alerts, and security visualization.
- Used Tailwind CSS and TypeScript to create scalable and clean frontend architecture.
- Implemented modern UI/UX design with real-time styled dashboard interactions.
- Structured the project using modular frontend development practices with Vite build tooling.

CERTIFICATIONS

- Cisco Networking Academy Ethical Hacker
- TryHackMe Pre Security
- TryHackMe Cybersecurity 101

EXTRACURRICULAR

National Service Scheme (NSS) - Volunteer

- Actively participated in community service and social awareness initiatives.
- Collaborated with teams to organize events and campaigns.
- Developed leadership, teamwork, and communication skills through volunteer work.

CONTINUOUS LEARNING

- Regularly practicing cybersecurity labs and learning paths on TryHackMe.
- Actively posting cybersecurity-related content and insights on LinkedIn.
- Exploring SOC operations, penetration testing methodologies, and threat detection workflows.
